Ear Nose & Throat Spray

all the benefits of silver

with the power of oxygen

www.healthwest.com.au

Ear Nose & Throat Spray (ENT) is designed to get at those hard to reach places such as the ears nose and throat.

Common complains such as, coughs, colds and ear infections may be caused by bacteria or viruses. In the case of ear infections fungus is often to blame.

Most disease-causing microorganisms are very sensitive to oxygen and cannot survive in its presence. Positively charged silver ions work by disrupting the ability of the microbe to conduct electricity and communicate with itself.

ENT contains only pure water, oxygen, and charged silver ions and does not contain any nanoparticles (metal colloids), fillers, stabilisers or chemicals of any sort.

EAR NOSE & THROAT SPRAY PRACTITIONER STRENGTH 50 PPM

(ENT - PS50) is designed to get at those hard to reach places such as the ears nose and throat.

Silver ions are increasingly being recognized for their broad-spectrum antimicrobial qualities and the fact that they are effective against a very broad range of bacteria.

Due to recent advances in the delivery of silver ions, they are now being used in a rapidly growing range of medical products.

ENT contains only pure water and charged silver ions and does not contain any nanoparticles (metal colloids), fillers, stabilisers or chemicals of any sort.
